

GlobalTranz provides a one-stop solution for reliable intermodal shipping services

GlobalTranz's intermodal shipping services offer you the door-to-door convenience of truckload shipping with the long-haul economy of rail transportation. When moving good across North America, intermodal is an economical, secure and environmentally friendly option for shipments of 500 miles or more.

Innovative Solutions for Intermodal Shipping

GlobalTranz's relationships with intermodal carriers, our best-in-class technology and our team of logistics experts can help lower your transportation costs, decrease supply chain inefficiencies, and to propel your business forward.

Reduce Emission

Shipping by rail burns less fuel than shipping by truck. Transporting freight shipments by train rather than trucks lessens greenhouse gas emissions by up to 75 percent.¹

Improve Reliability

When market volatility, new regulations or other factors impact available truckload capacity and rates, intermodal gives you the flexibility you need to ensure on-time, cost-effective transportation of your goods.

Optimize Costs

Intermodal loads travelling more than 500 miles usually have a lower cost per pound than over-the-road shipments.

Get Expert Support

Our seasoned logistics experts take a holistic and consultative approach to your transportation needs, ensuring that your goals are our priority. Our team leverages proven processes, proactive communication and our award-winning technology to help you achieve your objectives.

Additional Safeguards

When properly blocked and braced, intermodal provides shippers a safe and secure option to move freight.

Scalable & Configurable Technology

The GlobalTranz TMS technology delivers greater visibility, reduces costs and drives efficiencies. Whether you are a small-to-mid-size shipper seeking to book and track your shipments, or an enterprise shipper seeking a managed solution, the GlobalTranz TMS has you covered.
